DELAWARE COUNTY EMA

SIRENS ARE DESIGNED TO BE HEARD OUTDOORS

Outdoor warning sirens are designed to be heard outdoors. Anyone participating in outdoor activities such as walking, biking or camping may benefit from the outdoor siren system.

Those who work outdoors may not have other methods to receive tornado or emergency warnings. Sirens are only one warning system of many which currently exist.

Individuals who are inside homes or a businesses may not be able to hear a siren sound. We recommend using multiple methods to receive warnings, such as a NOAA All Hazards Radio or text alert system such as Delco Alerts, or local news media text alerts.

For more information on the outdoor warning siren system, receiving emergency communications, or severe weather preparedness, visit Delaware County Emergency Management on the web at www.delcoema.org, on social media @delcoema or contact Delaware County Emergency Management at (740) 833-2180.
